Mission Statement

War on Terror

WAT5 seeks an end to the senseless wars “on terror”, which are not only madness and unjust – they are also beyond expensive. The wars in Iraq and Afghanistan alone have cost U.S. taxpayers nearly $5 trillion so far. That is roughly US$ 666 per person on this planet and this doesn’t include all the other national governments their spending in this global insanity since 9/11, 2001. Above all, these alleged wars “against” terror have not resulted in any tangible benefits or positive results for the general public. Not in the Americas or Europe and not in Asia, Africa and the Middle East. Contrary to false beliefs, society isn’t more safe because of these wars. The opposite is true, more and more people around the world (on all continents) find themselves in the crosshairs of Western governments and their proxies. All in all, up to at least 3 million people have been deliberately killed by the western “democracy alliance” in the “war on terror” in Yemen, Iraq, Afghanistan, Pakistan, Somalia, Libya, Syria, Egypt and Palestine alone. Other theaters of war are not even mentioned herein. At least 90% of the deaths concerns civilians, non combatants, who are being regarded as mere ‘collateral damage’.

Invasions

WAT5 opposes all forms of invasions by foreign governments or foreign militaries, direct or through proxies.

Immunity & Defunding

WAT5 seeks the revocation of all forms of immunity enjoyed by the United Nations (UN), the North Atlantic Treaty Organization (NATO) and the European Union (EU). Like it is the case with national governments also the UN, NATO and the EU must be held accountable for all their actions.

WAT5 also seeks the defunding of the UN, NATO and the EU, i.e. no national funds of any country should continue to be deposited in the treasuries of the aforementioned organizations.

No citizen anywhere in the world can be forced to financially contribute to the aforementioned organizations.

Global Taxation

WAT5 opposes and annuls any form of global taxation, taxation beyond national borders, by any central(ized) institution, be it the UN or any other such formal body.
Fiat Money

**WAT5** opposes the further official use of fiat money by national governments. WAT5 seeks the reinstatement of gold-, silver-, real estate- or commodity-backed national currencies.

Global Currency

**WAT5** opposes the use of a national currency as a world or global currency. The US dollar as “the petrodollar” and global currency must be revoked.

Where a global currency does exist, it must be decentralized and on a non-governmental issuance basis. Bitcoin and similar crypto currencies are proposed as options or alternatives.

Climate

**WAT5** demands full disclosure by all national governments and intergovernmental institutions concerning the climate and weather on this planet. Including and not limited to the military-grade engineering of weather systems globally by any and all parties involved.

Redistribution of Food

**WAT5** seeks the redistribution of food and the rethinking of current food distribution systems.

Currently, approximately 1.3 billion tonnes of food, worldwide, gets lost or is wasted – every year – which amounts to roughly BTC 556.179.775 (US$ 990 billion or € 906 billion). For sure, as a global society we can do better and significantly lower the waste and losses while at the same time providing more food to those who are in hunger.

It is totally unacceptable that entire families are starving on one side of the world while others, and supermarkets and factories, are literally dumping their excess food in dumpsters where it is rendered tax-deductible.

Cyber Rights

**WAT5** deems access to and use of the internet as human rights that cannot be revoked by governments or institutions. No one shall be blocked from using the internet freely and anonymously.
